October 2002

Cadastral Records Directory (CRD)

A New System to access Plan Room reference and charting maps.

Charting and recording on the paper reference and charting maps held in the Plan Room at LPI Queens Square ceased from 6 September 2002, following a successful pilot of the new Cadastral Records Directory (CRD).

From Monday 9 September 2002 all recording and charting is now completed electronically against the electronic map, the Digital Cadastral Data Base (DCDB) to produce the CRD.

The CRD is one component of the overall LPI strategy to enhance the provision of service to clients through electronic service delivery. It is a valuable searching aid and replaces the ongoing need to chart and record titling information on paper maps.

Paper reference maps, whilst now a static record, will remain accessible to the public until such time as they are captured electronically. These maps will continue to be an integral part of the titling and mapping systems of NSW, whether they are held in the existing paper format or as electronic images in the future. Public access will be assured.

Searchers should continue to rely on the information and history contained in the paper reference and charting maps for all activity prior to 9 September 2002.

CRD inquiry terminals are located in the Plan Room. Users enter Lot/Plan numbers and their own reference details. If the Lot/Plan reference number entered is held within the CRD, the system will generate three hard copy reports:

* The Cadastre: a graphical display showing an extract from current cadastre as available from the DCDB including lot and plan numbers, street names etc. The Lot/Plan used to generate the report is displayed at the centre of the report.

* List of Charting Notations: for the area shown in the extract from the cadastre - references to plans lodged for pre examination and registration, plans recently registered but not displayed in the cadastre, as well as superseded or historical plans. Also listed are notations that would be expected on the former paper maps, including gazettals. In addition, the list references plan history held in the Integrated Titling System from March 1999.

* Plans List: a list of plans shown on the extract from the cadastre including their purpose and survey / compilation status.

Examples of each report are attached.

Reports, which are generated within a few minutes, can be collected by customers from document collection oboxes on the ground floor. There is currently no charge for this service.

For further inquiries please contact Garry Smith, Project Manager CRD by telephone 02 9228 6791 or email: garry.smith@ditm.nsw.gov.au
